- Works with Resource Groups
- Template-driven (JSON)
- Faster Compared to PowerShell
- User Rights (RBAC)
- Resource Tags
- multi-region

The diagram illustrates the Azure Resource Manager (ARM) architecture. At the top, a dashed box labeled 'Microsoft Azure' contains an 'Azure Subscription' icon. Inside the subscription, there are two 'Resource Group' boxes. The first Resource Group contains icons for 'LOB App', 'IaaS Workload', and 'SQL'. The second Resource Group contains icons for 'IaaS Workload', 'PaaS Workload', 'SQL', and 'My'. Below the Resource Groups is a bar labeled 'Resource Providers'. At the bottom, a green bar represents the 'Azure Resource Manager (ARM)', which is connected to 'REST API Endpoints' via three arrows.
